INTERNATIONAL ASSOCIATION
La Salle
UNIVERSITIES

The International Association of La Salle Universities, IALU, is the network of Lasallian higher education institutions around the world. IALU actively supports the promotion of the educational vision and charism of St. John Baptist de La Salle by facilitating innovative opportunities for collaboration, research, exchange and development among its member institutions.

Professionals
with value

Solidarity

What is a professional with value?

A professional with value is a person with transcendent vision, with full development of his human dimensions and with a vocational training based on the scientific, technological and humanities areas. A person who possesses integration perspectives to propitiate innovative solutions.

The professional with value in La Salle is a person with vocation of change, capable of transforming his local and global environment and with capacity of leadership and flexibility to generate offers and to take part actively.

At La Salle we form professionals with value capable of transforming the world.

Creativity Live long learning

Responsibility Sustainability Learning by doing

La Salle Universities

An innovative educational project with an international approach.

7 centers at the forefront of university education, where the professional and teaching worlds come together, as La Salle provides a practical and innovative training that includes the latest course material and teaching methodologies, as well as advanced technology in business innovation in its programs.

These 7 centers are also members of the IALU, International Association of La Salle Universities.

La Salle Campus Barcelona

La Salle, founder of Ramon Llull University, has one university campus in Barcelona specialized in Architecture, Engineering and Management.

This university education includes technical and scientific areas, especially in the fields of Telematics, Telecommunications, Sound and Image, Computer Science, Multimedia, Architecture, Building Engineering and Business Administration.

Academic and applied research are among its foundational goals, facilitating a favorable setting for research and development activities in collaboration with the business world. The campus houses La Salle Technova Barcelona, an innovation park specialized in entrepreneurship and the creation of new businesses. This platform promotes new technological enterprises. On the other hand, the innovation park also supports the innovative activity of technological companies.

La Salle Campus Barcelona, has another campus in the Dutch city of Almere, focused on the training of professionals in the fields of management, IT and Architecture. It offers in company training, focus programs and postgraduate studies.

ANGERS

ESAIP Angers, Graduate School of Engineering

Groupe ESAIP is a graduate school of engineering specializing in digital technology and industrial and environmental risk management in a distinctly international context.

- Groupe ESAIP's pedagogic project consists of the following core values:
- A project-based approach in which each student is a key player in his or her learning process.
 - An international pathway with two study periods at an overseas partner university, to develop students' multi-cultural awareness.
 - Two professional pathways:
 - Risk Management – occupational health and safety – environmental management – energy management.
 - Digital technology – IT security – mobile technology – networks – green IT.

BEAUVAIS - PARIS

La Salle Beauvais, Graduate School in Earth, Life and Environmental Sciences

Since 1854, La Salle Beauvais has been preparing generalist engineers for senior executive and top management positions in the following areas: agriculture, food industry, food and health, geology and environment. It also offers various accredited master's programs.

Located 45 minutes from Paris Charles De Gaulle Airport, the School has its own campus with residences, food services and sport facilities. Student intake is selective. Academic programs are research-based to support the wide range of scientific disciplines taught at the School. 90 % of the students are employed within one year of graduation.

True to the founding principles of the School, the graduate programs focus on the development of personal values, management and leadership skills. Students have many opportunities to apply these skills on campus. Our vibrant community welcomes 1,850 French and international students.

LYON

ECAM Lyon Graduate School of General Engineering

For more than 110 years, ECAM Lyon has been recognized as a multi-disciplinary engineering school in the traditional of "Arts et Métiers". ECAM Lyon offers 3 programs of study: a 5-year program in General Engineering, Blended Work and Study programs: specialization in Industrial and Mechanical Engineering, Energy Exploitation and Maintenance or Wood; and an Advanced Master's Degree in Lean Management.

ECAM Lyon combines scientific and technical expertise, a human and social approach and an international dimension in all programs. From an academic perspective, the school focuses on supporting its engineering students at all times and also strives to develop a close relationship between its teachers and students. ECAM Lyon is a highly adaptable school that is always looking to encourage innovation in order to meet the needs of industry. Our main goal is to remain a top school, open to all.

MADRID

La Salle Campus Madrid

La Salle Campus Madrid was born 60 years ago and its training offer is organized around the University Center and the Business School.

The University Center is characterized by a student-centered learning methodology; the student becomes the main actor and the driving force in his/her training process. La Salle offers degrees in two areas:

Education. In its origin, the University Center was a Teacher Training School and nowadays it plays a leading role in the training of Primary Education teachers. It also provides training in the fields of Social Education and Social Work, which are intimately linked to La Salle's commitment with poor people's education.

Health. Currently, La Salle offers two health-related degrees: Occupational Therapy Degree and Physiotherapy Degree. La Salle has invested for the future: a new building has been built and the Integral Center of Rehabilitation has been inaugurated to provide students with a real healthcare environment.

La Salle Business School was created with an international vocation and its mission is to train our future managers and professionals. It offers an array of cutting-edge postgraduate studies, adapted to the labor market demand in the fields of Education, Business and Health.

OPEN CAMPUS

La Salle Open University

The Open University of La Salle UOLS was created with an international vocation to serve whoever wants to improve their knowledge, competence and skills in different fields.

UOLS belongs to the European Higher Education Area (Bologna Process), and is a University Open to people, countries, access (without entry requirement in many programs), learning methods, timetables, etc. UOLS, meanwhile its Research Institute, will offer the students, the latest innovations in online and blended learning, adapted to the circumstance of different countries.

La Salle Open University is a key part of the International Association of Lasallian Universities, an organization where students can work in an international setting, combining in-classroom learning in different locations with online components. These students will form part of one of the greatest university organizations worldwide.

MOUNIER - PARIS

La Salle Mounier

La Salle Mounier (ISFEC) is an Institute of Catholic higher education from Paris.

La Salle Mounier is specialized for the initial training of teachers of the 1st degree (Nursery and Primary) with a master's teaching, education and training (MEEF) in two years. Also prepares the competitive recruitment of school teachers (CRPE) and for training for careers education in France and abroad by the master international educational activity (MAEI) in two years and for the teacher training exercise as part of their training (personalized pedagogy, differentiation, Dyslexia ...)

The educational project is based on the Lasallian congregation: team working, believing in the potential development of each child and encouraging the growth of the whole person, paying particular attention to the plight of young people (social, educational and cultural), accepting diversity as an asset, fostering personal development, and finding the best professional skills through the formation and the exchange of experiences.
